

# transform the way you clean

A quiet, light & healthy cleaning  
system that is much more powerful  
than a conventional vacuum cleaner

# central vacuum systems

Not all vacuum cleaning systems are the same. We provide some of the most powerful and technically advanced vacuum systems available.

Our central vacuum systems are typically 5 times more powerful than a portable vacuum cleaner, which means that you can clean quicker and far more effectively. You no longer need to lift a heavy and cumbersome vacuum cleaner from room to room, or up and down the stairs. With only a light, flexible hose gliding behind you, the telescopic wand can be adjusted to assist you in keeping an upright posture. By including an automatic dust pan, the kitchen floor can be easily swept clean, at any time.

## Quiet

With the power unit located in the garage or utility room, instead of hearing the intrusive noise of a motor, you can enjoy listening to your favourite CD and relax as you clean.

## Superior Filtration

Have you ever noticed the dusty smell when using the vacuum cleaner? That's the smell of fine dust being recirculated into the home. An ADM unit benefits from the superior Duofib filter which captures the finest dust particles even down to 0.1 micron at 97.5% efficiency. As well as offering little resistance to airflow, which is necessary for optimum performance, the filter provides maximum protection to the motor. This means outside venting is not necessary giving total flexibility for positioning of the power unit.

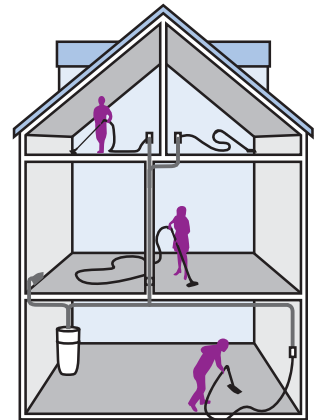

## Convenient

The large dust container only needs emptying two to three times a year, and there are no dust bags to change or purchase.

All surfaces from floors to curtains and furnishings are cleaned more easily and effectively. You can even have an inlet socket in the garage making cleaning the inside of the car so much more convenient.

Central vacuum systems can be installed easily in both existing and new properties of all sizes, and the cost is a lot less than you might imagine.

An ADM cleaning system consists of a wall-mounted power unit, usually located in the garage or utility room. It is connected via concealed 50.8mm pipework and low-voltage wire to inlet valves which are appropriately located in the house. Plugging the hose into an inlet valve starts up the system. As you clean, dirt is sucked away through the pipework into a dust container located on the power unit.

“An ADM central vacuum system is a highly desirable and marketable feature and provides a sound investment at a relatively low cost.”

Chris Marriott  
Managing Director, ADM Systems

## Technically Advanced

While all our systems benefit from advanced technology, the Silentium™ is recognised as the most advanced central vacuum on the market today. This intelligent system benefits from an LED indicator, which tells you when the dust container is nearly full as well as a host of other helpful information indicators. Demonstrated in independent tests, the Silentium™ has a lower sound output than other central vacuums and is therefore exceptionally quiet.

## Healthier

You will reduce the amount of allergens in your home as the powerful suction efficiently removes dust mites, dust, dirt, pollen and pet dander. The highly efficient filter together with the cyclonic force, separate particles from the air and deposit them into the bottom of the dust container. Even if damp the unique filter will not promote biological growth. An ADM system benefits young children, asthma and allergy sufferers alike.

## The Best Quality Motors

All the systems benefit from Ametek-Lamb by-pass, tangential evacuation motors. Only minimal self-maintenance is required so dust build up will never affect the power of a central vacuum.

## 5 Year Guarantee

When the system is commissioned you know you will have the complete peace of mind that comes with every central vacuum system. All of our central vacuum system units come with a 5 year warranty – a further reason to choose an ADM central vacuum system.

## All Year Round Benefits

- No heavy vacuum cleaner to carry around the house
- No recycled dust-laden air
- 97.5% efficient filter
- No external vent necessary
- Exceptionally quiet
- Corrosion resistant
- 5 times more powerful than a portable vacuum
- Unobtrusive
- Easy to use
- Easy to install

With the right accessories, the smallest corners are easily cleaned, right up to the edge of carpets, hard floors and even those awkward places.

## Accessories

Designed to meet all your needs, you simply choose the right ones for you.

- Remote controlled crush proof hoses come in a range of sizes. Our hoses are light-weight and easy to use; simply 'coil up' for storage on our hose rack when your vacuuming is done. They come complete with a hose sock to protect hard floors and furniture.

- Maximum versatility and efficiency is ensured with a range of brushes designed for carpets, hard floors, tiles upholstery and dusting. Turbo brush is also available for 'beating' carpets and rugs providing more effective cleaning

- Our automatic dustpan is a must for hard floor areas like the kitchen and utility room.

- Simply plug in to a convenient vacuum point. Vacuum points are small and unobtrusive (89 x 89mm).

- Useful crevice tool enables you to clean awkward places
- A handy bag and hose rack provide compact storage for all accessories
- A wet and dry pick up for vacuuming wet areas and spillages
- Micro-attachment set for delicate cleaning such as glassware and keyboards
- Wireless remote-control options available

## Quality That Shows

ADM Systems supplies the world leader in central vacuum systems. Since 1967 they have dedicated their efforts exclusively to the development of high quality central vacuum systems and the difference shows. Made in Canada, the systems are built from durable state-of-the-art components and are manufactured to the highest quality standards. Designed to give maximum performance for many years, each system is thoroughly tested and carefully inspected before leaving the factory.

The benefits include:

- Long product life - up to 30 years\* of operation
- Efficient motors protected by double ball bearings
- High-powered suction
- The unique filter protects the motor from damage
- The lightweight dust container is made from one piece of spun aluminium, there are no seams, therefore no leaks and no rust

\*based on 1 hour of domestic use per week

## Comprehensive Range of Power Units

Whatever the application, we have a range of power units and cleaning accessories to suit your needs. From the smallest apartment to the largest home or business, we have the solution.

Contact ADM to see which system would best suit you.

## The ADM Service

ADM is the leading independent specialist in energy efficient air management systems in the UK, with over 20 years' experience at the forefront of its development.

ADM Systems offer a comprehensive service from initial advice through to installation. From a copy of your plans, or by surveying your property, ...or even by taking details over the phone, we can provide you with a precise specification of the system which best suits your needs together with a detailed, no-obligation quotation.

Alternatively, if you choose to install the system yourself we will work alongside you or your construction team by offering comprehensive technical support.

Call us now, we offer free effective advice.
