

## Globo 1.4 Central vacuum unit

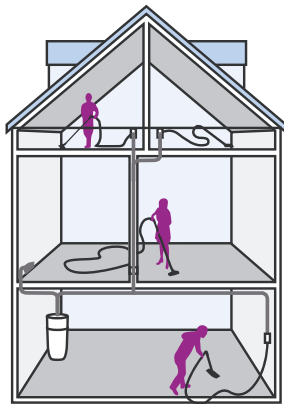

### Central Vacuum Systems

Not all vacuum cleaning systems are the same. We provide some of the most powerful and technically advanced vacuum systems available.

Our central vacuum systems are typically 5 times more powerful than a portable vacuum cleaner, which means that you can clean more quickly and far more effectively. You no longer need to lift a heavy and cumbersome vacuum cleaner from room to room, or up and down the stairs. With only a light, flexible hose gliding behind you, the telescopic wand can be adjusted to assist you in keeping an upright posture. By including an automatic dust pan, the kitchen floor can be easily swept clean.

With the power unit located in the garage or utility room, instead of hearing the intrusive noise of a motor, you can enjoy listening to your favourite CD and relax as you clean.

An ADM cleaning system consists of a wall-mounted power unit connected via concealed 50.8mm pipework and low-voltage wire to inlet valves which are appropriately located in the house. Plugging the hose into an inlet valve starts up the system. As you clean, dirt is sucked away through the pipework into a dust container located on the power unit.

### Features and Benefits

- Double-filtering system, an exclusive feature of this range, with a primary washable polyester cartridge filter, and an included but optional polyester bag filter preventing saturation of the primary filter
- Practical and hygienic disposal of waste using included adapter and removeable polyester fabric bag
- Constructed from V2 certified self-extinguishing polymer
- IP44 rated
- Suitable for small-sized properties

### Technical Specification

<b>Performance</b>	
Motor Power	1.4/1.5 kW (1500)
Air Watts	505
Air Flow	205 m <sup>3</sup> /h
Tank Capacity	6 litres
<b>Filtration</b>	
Filter	Polyester
Filter Bag (optional use)	Polyester
<b>Environmental</b>	
IP Rating	IP 44
Noise Outbreak	<60 dB(A)
<b>Physical</b>	
Height	620 mm
Width/Depth	300 mm
Weight	9 kg
<b>Inlet Specification</b>	
Inlet Valves	Up to 6
Furthest Valve From Unit	25 m
